

An Excellent Value for Hospitals/Patients

# BANYAN VAGINAL/RECTAL PROBES FOR LAPAROSCOPY

*Low-cost reusable instruments that enhance accurate anatomical visualization during gynecological surgery*

### Reusable, Easy to Sterilize Ergonomic Design

Probes are easily positioned to maximize anatomical visualization. Clean and reuse them minimizing use of disposables and lowering hospital cost.

### Created by Laparoscopist

Identifies the course of the rectum and vagina easily allowing for lesions to be excised.

### Ensures Maximum Accuracy

Assists in opening rectovaginal pouch and mapping of cul-de-sac.

### Clear Visualization for Surgeon

Probes identify open vessels and other injuries and acts as a mobilizer when dissecting, cauterizing, and suturing.

### Saves Time

Allows for easy excisions of lesions from posterior vagina, rectum, and cul-de-sac.

### Quality Manufacturing

Color coded handles, surgical grade stainless steel shafts and atraumatic tips made of high grade polymer.
